Leak/Wipe Testing Service Order Form and Price Schedule

AEIL has complete Leak/Wipe test kits available for clients who are licensed to test their own sealed radioactive sources or surface areas. These kits are mailed to the client as required on a calendar recall basis. This is a helpful reminder to keep your records current and in compliance with the Nuclear Regulatory Commission and Agreement States. General instructions are included and specific directions for unusual situations are available.

LEAK/WIPE KIT REQUEST

Most radioactive material users are required to test their sealed sources for removable contamination every six months. Check your radioactive materials license if you are uncertain as to the frequency your company must perform these tests. Please indicate the number of Leak/Wipe Kits needed under the appropriate month(s).

01 JAN	02 FEB	03 MAR	04 APR	05 MAY	06 JUN	07 JUL	08 AUG	09 SEP	10 OCT	11 NOV	12 DEC

The number of Leak/Wipe Kits you indicate above will automatically be mailed just before the indicated month(s).

Upon AEIL's receipt of the completed Leak/Wipe Kit(s), analysis is performed in our radioisotope lab, and computer generated certificates are issued to the client. If the results exceed permissible levels (i.e.; 0.005 microcurie of removable contamination on sealed sources), the client will be contacted immediately by telephone. AEIL personnel are available to perform these tests at your company if you prefer. Charges are made according to distance from our laboratory and time involved.

Should you require additional information, please contact us at (713) 790-9719 or toll free at (877) 866-AEIL.
